

COHORT 04 // AI ENGINEERING PROGRAM

8 Week Curriculum and Project Portfolio

48 mini builds. 8 major projects. One engineer, fully shipped.

WEEKS

PART ONE

Why Engineers Choose Trafy AI

Real outcomes from real cohorts, and a structure built to keep producing them.

Multiple alumni now work at 40 LPA and above, across Google, Amazon, Uber, and more.

A growing network our alumni are proud to be part of.

 Google 44 LPA Shruti AI Engineer	 Uber 36 LPA Rohan Parthak Software Engineer	 Amazon 22 LPA Rahul AI/ML Engineer
--	---	---

Individual results vary based on prior experience, role, and market conditions.

WHAT MAKES THE DIFFERENCE

Live, Not Self Paced

A real mentor runs a session every weekday. This is not a video library, it is a cohort that meets.

AI Code Review on Every Build

Every submission is reviewed for production quality, not just checked for completion, before the next session.

A Shipped Portfolio, Not a Certificate

48 mini builds and 8 major projects, each one deployed and public. What you show a hiring manager is working software.

Curriculum Built Around Real Roles

Every week maps to what AI engineering teams actually hire for, from prompt engineering to production deployment.

PART TWO

The 8 Week Curriculum

Every week pairs a live focus area with a set of shipped builds. Concepts are taught exactly when a project needs them, never before.

WK.01 Mission 01

Think Like an AI Engineer

Stop being a tutorial watcher. Start shipping software.

TOPICS

AI Engineering vs Machine Learning	Modern AI ecosystem	Python essentials	Git and GitHub
APIs	JSON	VS Code	Prompt Engineering Basics
AI assisted development			

MICRO BUILDS

AI Calculator	AI Terminal Assistant	Smart Unit Converter	AI Text Formatter
Prompt Playground			

WEEKEND BUILD

Build Your First AI Employee. AI Personal Assistant.

Chat Interface	Memory	Theme Switching	Conversation History
Export Chats			

SKILLS UNLOCKED

Python	APIs	Prompt Engineering	JSON
Git			

OUTCOME

Ships a working AI assistant and a GitHub habit. Proof of going from a blank file to a running app in one week.

WK.02 Mission 02

Build AI Applications

Move from single prompts to real product surfaces.

TOPICS

OpenAI API	Streaming Responses	Context Windows	Prompt Chaining
System Prompts	Function Calling		

MICRO BUILDS

Email Generator	Cover Letter Generator	Meeting Summary Tool	Blog Generator
AI Translator			

WEEKEND BUILD

Launch Your First Content Engine. AI Content Studio.

Blog Generator	LinkedIn Generator	Tweet Generator	Email Generator
Tone Control			

SKILLS UNLOCKED

OpenAI API	Streaming	System Prompts	Function Calling
------------	-----------	----------------	------------------

OUTCOME

A deployed multi format content generator. First live URL in the portfolio.

WK.03 Mission 03

Teach AI to Read Books

Give AI real documents to reason over.

TOPICS

PDFs	CSV	Embeddings	Vector Search
RAG	Chunking		

MICRO BUILDS

PDF Chat	CSV Chat	FAQ Bot	Resume Analyzer
Invoice Reader			

WEEKEND BUILD

Build a Research Brain. AI Research Assistant.

Upload PDFs, Notes, Books	Ask Questions	Receive Sources
---------------------------	---------------	-----------------

SKILLS UNLOCKED

Embeddings	Vector Search	RAG	Chunking
------------	---------------	-----	----------

OUTCOME

A retrieval augmented app that answers from real source material. The skill AI native companies hire for.

WK.04 Mission 04

Replace Your Gmail With AI

Wire AI into the tools people actually run their day on.

TOPICS

Automation	APIs	Webhooks	Email
Calendar	AI Workflows		

MICRO BUILDS

Gmail Automation	Calendar Scheduler	Invoice Generator	AI Reminder
Meeting Organizer			

WEEKEND BUILD

Build Your Own Chief of Staff. AI Executive Assistant.

Email	Calendar	Scheduling	Summaries
Task Manager	Notifications		

SKILLS UNLOCKED

Webhooks	Automation	Calendar and Email APIs
----------	------------	-------------------------

OUTCOME

A live automation system running against real accounts. The project hiring managers forward internally.

WK.05 Mission 05

Build an AI Team

Move from one model call to a team of them.

TOPICS

Agents	Memory	Planning	Multi step Reasoning
Tool Calling			

MICRO BUILDS

Research Agent	Coding Agent	Travel Agent	Finance Agent
Study Agent			

WEEKEND BUILD

Launch a Multi Agent Productivity Suite. Multi Agent Productivity Suite.

Research Agent	Writing Agent	Planning Agent	Execution Agent
Review Agent			

SKILLS UNLOCKED

Agentic Design	Tool Calling	Multi step Reasoning
----------------	--------------	----------------------

OUTCOME

A coordinated team of agents shipping work end to end. The exact pattern AI native startups hire to build.

WK.06 Mission 06

Go Full Stack

Wrap the AI in a real product: auth, database, UI.

TOPICS

FastAPI	React	Authentication	Databases
Docker			

MICRO BUILDS

Login API	CRUD API	JWT Authentication	File Upload
Dashboard			

WEEKEND BUILD

Launch Your First AI SaaS. AI SaaS Platform.

Authentication	Dashboard	Chat	Payments (Demo)
Projects		Deploy	

SKILLS UNLOCKED

FastAPI	React	PostgreSQL	JWT
Docker			

OUTCOME

A full stack, authenticated, deployed AI SaaS. Indistinguishable from a funded startup's MVP.

WK.07 Mission 07

Make It Production

Take the SaaS from working on my machine to production grade.

TOPICS

Monitoring	Logging	Rate Limiting	Redis
Performance		Deployment	

MICRO BUILDS

Logging System	Docker Container	Redis Cache	Monitoring Dashboard
CI/CD Pipeline			

WEEKEND BUILD

Harden It Like an Engineer. Production AI System.

Deploy	Docker	Redis	Database
Authentication		Monitoring	

SKILLS UNLOCKED

CI/CD	Redis	Monitoring	Rate Limiting
-------	-------	------------	---------------

OUTCOME

A system that survives real traffic and real failure. The difference between a student project and an engineer.

WK.08 Mission 08

Convince a Company to Hire You

One capstone, built to be shown in an interview room.

TOPICS

System Design	Product Thinking	Storytelling	Interview Readiness
---------------	------------------	--------------	---------------------

MICRO BUILDS

None this week. Capstone week is fully self directed.

WEEKEND BUILD

Convince a Company to Hire You. Industry Capstone. Choose one..

AI CRM	AI ATS	Medical AI Assistant	Legal AI Assistant
AI Tutor	AI Customer Support	AI Sales Agent	Custom Startup Idea

SKILLS UNLOCKED

End to end ownership	Product framing	Demo storytelling
----------------------	-----------------	-------------------

OUTCOME

A capstone application, a recorded demo, and an interview ready story. Graduation day.

PART THREE

8 Projects You Will Ship

One flagship build per week. Each one deployed, documented, and added to a public GitHub and portfolio.

AI Personal Assistant

FOUNDATION

Week 1 · 5 days

A chat based assistant with persistent memory, theme switching, and full conversation export. The first thing every learner deploys.

TECH STACK

Python, OpenAI API, JSON

SKILLS UNLOCKED

Prompt Engineering, Memory Design, Git Workflow

AI Content Studio

APPLIED

Week 2 · 5 days

One studio, five formats. Blog posts, LinkedIn posts, tweets, and emails generated and tuned by tone.

TECH STACK

OpenAI API, Streaming, Next.js

SKILLS UNLOCKED

Prompt Chaining, System Prompts, Tone Control

AI Research Assistant

INTERMEDIATE

Week 3 · 6 days

Upload PDFs, notes, and books. Ask questions and get sourced answers, not hallucinations.

TECH STACK

Embeddings, Vector DB, RAG

SKILLS UNLOCKED

Chunking, Vector Search, Source Citation

AI Executive Assistant

INTERMEDIATE

Week 4 · 6 days

Runs against a real inbox and calendar. Summarizes, schedules, and reminds without being asked twice.

TECH STACK

Webhooks, Gmail API, Calendar API

SKILLS UNLOCKED

Automation Design, Task Orchestration

Multi Agent Productivity Suite

ADVANCED

Week 5 · 7 days

Five agents. Research, writing, planning, execution, review. Working a task the way a small team would.

TECH STACK

Agent Framework, Tool Calling, Python

SKILLS UNLOCKED

Multi step Reasoning, Agent Orchestration

AI SaaS Platform

ADVANCED

Week 6 · 7 days

Auth, dashboard, chat, demo payments, and deploy. A real SaaS shell learners can rebrand and reuse.

TECH STACK

FastAPI, React, PostgreSQL, Docker

SKILLS UNLOCKED

Authentication, Full stack Architecture

Production AI System

ADVANCED

Week 7 · 7 days

The SaaS platform hardened with logging, caching, monitoring, and a real CI/CD pipeline.

TECH STACK

Docker, Redis, CI/CD

SKILLS UNLOCKED

Monitoring, Rate Limiting, Deployment Hygiene

Industry Capstone

CAPSTONE

Week 8 · 7 days

One domain, chosen by the learner. AI CRM, AI ATS, Medical AI, Legal AI, AI Tutor, Sales Agent, or a custom idea. Built to demo in an interview.

TECH STACK

Full Stack, Learner's Choice of Domain

SKILLS UNLOCKED

System Design, Product Thinking, Storytelling

PART FOUR

Cohort 04 Enrollment

Everything in this document. 8 weeks, 48 builds, 8 shipped projects, mentor review, and a live cohort community.

50% OFF

~~Rs. 1,00,000~~

Rs. 49,999

Cohort 04 introductory pricing. One time payment, no hidden fees.

WHAT IS INCLUDED

- 8 weeks of live, mentor led sessions
- 48 mini builds and 8 major shipped projects
- AI code review on every submission
- Live cohort community and demo days
- Portfolio, GitHub, and interview ready capstone

Apply to Interview
